Sir:

Appellant has reviewed the Examiner's Answer and respectfully submits the following comments:

Notwithstanding the Examiner's Answer, it is respectfully submitted that the recited subject matter is not provided by Hickey et al. The remarks of Page 4 relate to the word "implant," however, claim 1 recites more than "implant." Appellant respectfully submits that the discussion of claim 1 in the appeal brief relates to a device that is adapted for implantation into body tissue as recited in claim 1. Claim 1 recites, among other things:

the device of Hickey et al. is not an appropriate substitute and does not provide the recited limitations of claim 1. For example, Hickey et al. does not provide an expandable element adjacent a body lumen. Furthermore, it is respectfully submitted that Hickey et al. would not be used as shown in FIG. 6 and as described by the present specification.

Appellant respectfully submits that the defects in Hickey et al. substantiate the lack of motivation to combine Hickey et al. and Whitehouse.

Appellant respectfully submits that the remaining comments are already addressed by the Appeal Brief and distinguish the recited subject matter over the rejections and the present comments.

Reconsideration and withdrawal of the rejection are again respectfully requested, or if the matter should proceed to appeal, an order from the Board of Patent Appeals and Interferences withdrawing the rejection is respectfully requested.

Respectfully submitted,

JOHN H. BURTON ET AL.
